PERGAMON

Aims and Scope of the Journal

Now that man has become accustomed to the idea of exploring space, he has turned his attention to the equally challenging task of exploring and making effective use of the oceans. It is already apparent that the rewards of this effort will include new scientific knowledge and understanding of the oceans, increased food production from them, and increased mineral, oil and gas resources. Working in an environment as hostile as a deep ocean presents engineering problems which are at least as challenging as those encountered in space exploration.

Ocean Engineering provides a medium for the publication of original research and development work in this field. In recognition of the fact that many research and development workers are now entering it, occasional review articles by leading authorities are published.

Because the field of ocean engineering is rapidly expanding, it would be unwise to define the scope of the journal too precisely. Areas that are to be covered, fixed and floating, are the design and construction of structures (including ships), submarine soil mechanics, coastal engineering, properties and fabrication of materials, stress analysis and hydrodynamic properties of shells, underwater instrumentation, power and propulsion systems, aquacultural engineering and underwater acoustics. Work on marine resources will also be included.

Publication information: *Ocean Engineering* (ISSN 0029-8018). For 2000, volume 27 is scheduled for publication. Subscription prices are available upon request from the Publisher or from the Regional Sales Office nearest you or from this journal's website (http://www.elsevier.nl/locate/oceaneng). Further information is available on this journal and other Elsevier Science products through Elsevier's website: (http://www.elsevier.nl). Subscriptions are accepted on a prepaid basis only and are entered on a calendar year basis. Issues are sent by standard mail (surface within Europe, air delivery outside Europe). Priority rates are available upon request. Claims for missing issues should be made within six months of the date of dispatch.

Orders, claims, and product enquiries: please contact the Customer Support Department at the Regional Sales Office nearest you:

New York: Elsevier Science, PO Box 945, New York, NY 10159-0945, USA; phone: (+1)(212)633 3730 [toll free number for North American customers: 1-888-4ES-INFO (437-4636)]; fax: (+1)(212)633 3680; e-mail: usinfo-f@elsevier.com

Amsterdam: Elsevier Science, PO Box 211, 1000 AE Amsterdam, The Netherlands; phone: (+31) 20 4853757; fax (+31) 20 4853432; e-mail: nlinfo-f@elsevier.nl

Tokyo: Elsevier Science, 9-15 Higashi-Azabu 1-chome, Minato-ku, Tokyo 106-0044, Japan; phone: (+81)(3) 5561 5033; fax: (+81)(3) 5561 5047; e-mail: info@elsevier.co.jp

Singapore: Elsevier Science, No. 1 Temasek Avenue, #17-01 Millenia Tower, Singapore 039192; phone: (+65) 434 3727; fax: (+65) 337 2230; e-mail: asiainfo@elsevier.com.sg

Rio de Janeiro: Elsevier Science, Rua Sete de Setembro 111/16 Andar, 20050-002 Centro, Rio de Janeiro -RJ, Brazil; phone: (+55)(21)509 5340; fax: (+55)(21) 507 1991; e-mail: elsevier@campus.com.br [Note (Latin America): for orders, claims and help desk informaiton, please contact the Regional Sales Office in New York as listed above]

Microform and Back Issues

Back issues of all previously published volumes, in both hard copy and in microform, are available direct from Elsevier Science offices (Oxford, New York).

This journal and the individual contributions contained in it are protected under copyright by Elsevier Science Limited and the following terms and conditions apply to their use:

Photocopying

Single photocopies of single articles may be made for personal use as allowed by national copyright laws. Permission of the publisher and payment of a fee is required for all other photocopying, including multiple or systematic copying, copying for advertising or promotional purposes, resale and all forms of document delivery. Special rates are available for educational institutions that wish to make photocopies for non-profit educational classroom use.

Permissions may be sought directly from Elsevier Science Rights & Permissions Department, PO Box 800, Oxford OX5 1DX, UK; phone: (+44) 1865 843830, fax: (+44) 1865 853333, e-mail: permissions@elsevier.co.uk. You may also contact Rights & Permissions directly throught Elsevier's home page (http://www.elsevier.nl), selecting first 'Customer Support', then 'General Information', then 'Permissions Query Form'.

In the USA, users may clear permissions and make payments through the Copyright Clearance Center, Inc., 222 Rosewood Drive, Danvers, MA 01923, USA; phone: (978) 7508400, fax: (978) 7504744, and in the UK through the Copyright Licensing Agency Rapid Clearance Service (CLARCS), 90 Tottenham Court Road, London W1P 0LP, UK; phone: (+44)171 631 5555; fax: (+44) 171 631 5500. Other countries may have a local reprographic rights agency for payments.

Derivative Works

Subscribers may reproduce tables of contents or prepare lists of articles including abstracts for internal circulation within their institutions. Permission of the publisher is required for resale or distribution outside the institution.

Permission of the publisher is required for all other derivative works, including compilations and translations.

Electronic Storage or Usage

Permission of the publisher is required to store or use electronically any material contained in this journal, including any article or part of an article.

Except as outlined above, no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without prior written permission of the publisher.

Address permissions requests to: Elsevier Science Rights & Permissions Department, at the mail, fax and e-mail addresses noted above.

Notice

No responsibility is assumed by the publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein. Because of rapid advances in the medical sciences, in particular, independent verification of diagnoses and drug dosages should be made.

Although all advertising material is expected to conform to ethical (medical) standards, inclusion in this publication does not constitute a guarantee or endorsement of the quality or value of such product or of the claims made of it by its manufacturer.

♾ The paper used in this publication meets the requirements of the ANSI/NISO Z39.48-1992 (Permanence of Paper).

VOLUME CONTENTS

Number 1

K. -H. Wang and X. Ren	1	Interactions of cnoidal waves with cylinder arrays
S. Kocabiyik and P. Nguyen	21	On a translating and transversely oscillating cylinder: Part 2: Effect of the velocity ratio on the hydrodynamic forces and the near-wake structure
B. -F. Chen	47	Viscous free surface effect on coastal embankment hydrodynamics
I. R. Young	67	*Technical Note* An intercomparison of GEOSAT, TOPEX and ERS1 measurements of wind speed and wave height
V. S. Kumar, M. C. Deo, N. M. Anand and P. Chandramohan	83	*Technical Note* Estimation of wave directional spreading in shallow water

Number 2

E. Avital and T. Miloh	99	On an inverse problem of ship-induced internal waves
D. Vassalos	111	Physical modelling and similitude of marine structures
K. Nishimoto, F. Kaster, I. Q. Masetti, J. Matsuura and J. A. P. Aranha	125	Full scale decay test of a tanker: field data and theoretical analysis
H.-K. Chang and S.-C. Lin	147	An explicit approximation to the wavelength of nonlinear waves
V. Sundar, S. A. Sannasiraj and H. Kaldenhoff	161	Directional spreading of waves in the near-shore zone
	189	News and Notices

Number 3

M. C. Deo and C. S. Naidu	191	Real time wave forecasting using neural networks

V. Panchang, L. Zhao and Z. Demirbilek	205	Estimation of extreme wave heights using GEOSAT measurements
K. W. Holappa and J. M. Falzarano	227	Application of extended state space to nonlinear ship rolling
S. N. Rao and A. P. Panda	241	Non-linear analysis of undrained cyclic strength of soft marine clay
M. Y. Zhang, J. Monbaliu and C. S. Yu	255	A Eulerian-Lagrangian method for the simulation of wave propagation
		Technical Note
Z.-J. You	277	The inception of sheet flow in oscillatory flow

Number 4

C. Skotner and C.J. Apelt	287	Internal wave generation in an improved two-dimensional Boussinesq model
H.-H. Hsu and Y.-C. Wu	325	Scattering of water wave by a submerged horizontal plate and a submerged permeable breakwater
S. Bal	343	A potential based panel method for 2-1 hydrofoils
R. Sundaravadivelu, V. Sundar and T.S. Rao	363	Wave forces and moments on an intake well

Number 5

M. R. Haddara and J. Xu	381	On the identification of ship coupled heave-pitch motions using neural networks
J. M. Niedzwecki, J. W. van de Lindt and E. W. Sandt	401	Characterizing random wave surface elevation data
I. R. Soedigdo, K. F. Lambrakos and B. L. Edge	431	Prediction of hydrodynamic forces on submarine pipelines using an improved Wake II Model
G. Rajasekaran, K. Murali, R. Srinivasaraghavan	463	Microfabric, chemical and mineralogical study of Indian marine clays

		Technical Note
P. A. A. Laura and C. A. Rossit	485	Thermal bending of thin, anisotropic, clamped elliptic plates

Number 6

C. Cunha and C. Guedes Soares	489	On the choice of data transformation for modelling time series of significant wave height
G. Lindgren, I. Rychlik and M. Prevosto	507	Stochastic Doppler shift and encountered wave period distributions in Gaussian waves
P. Liu and N. Bose	519	Hydrodynamic characteristics of a lunate shape oscillating propulsor
S. Huang	531	Stability analysis of the heave motion of marine cable-body systems
M. L. Nuckols	547	Analytical modeling of a diver dry suit enhanced with micro-encapsulated phase change materials
O. Barton Jr	565	Fundamental frequency of tapered plates by the method of eigensensitivity analysis
H. H. Lee, P. -W. Wang and C. -P. Lee	575	Dragged surge motion of tension leg platforms and strained elastic tethers

Number 7

D.L. Foster, R.A. Guenther and R.A. Holman	595	An analytic solution to the wave bottom boundary layer governing equation under arbitrary wave forcing
U.A. Korde	625	Efficient primary energy conversion in irregular waves
A.V. Ranga Rao and R. Sundaravadivelu	653	A knowledge based expert system for design of berthing structures
		Technical Note
S. Rao, N.B.S. Rao and V.S. Sathyanarayana	675	Laboratory investigation on wave transmission through two rows of perforated hollow piles

Number 8

A. Kükner and M. A. Baykal	703	Wave sloshing in corrugated bottom tanks with two-dimensional flow
J. A. Ferreira and C. Guedes Soares	713	Modelling the long-term distribution of significant wave height with the Beta and Gamma models
R. Latorre and M. Mizina	727	Design study for outboard propeller with spoiler
S. Neelamani, H. Schüttrumpf, M. Muttray and H. Oumeraci	739	Prediction of wave pressures on smooth impermeable seawalls
Z. L. Zou	767	Higher order Boussinesq equations
S. E. Mouring	793	*Technical Note* Buckling and postbuckling of composite ship panels stiffened with preform frames
C. Rivera and M. Hinchey	805	*Technical Note* Hydrodynamic loads on subsea robots

Number 9

F. D. E. Dewi, S. I. Liapis and R. H. Plaut	813	Three-dimensional analysis of wave attenuation by a submerged, horizontal, bottom-mounted, flexible shell
V. Sundar, P. M. Koola and A. U. Schlenkhoff	841	Dynamic pressures on inclined cylinders due to freak waves
J. Vasconcellos	865	A decision support system for floating platform design
J. M. Vasconcellos and R. Latorre	891	Development of BOATDSS high speed boat design database

Number 10

C. Skotner and C. J. Apelt	905	Application of a Boussinesq model for the computation of breaking waves Part 1: Development and verification

C. Skotner and C. J. Apelt	927	Application of a Boussinesq model for the computation of breaking waves Part 2: Wave-induced setdown and setup on a submerged coral reef
H. Mase and T. Kitano	949	Prediction model for occurrence of impact wave force
M. Zeinoddini, J. E. Harding and G. A. R. Parke	963	Dynamic behaviour of axially pre-loaded tubular steel members of offshore structures subjected to impact damage
H. Yılmaz and A. Kükner	979	Evaluation of cross curves of fishing vessels at the preliminary design stage
G. Rodríguez, C. Guedes Soares and U. Machado	991	Uncertainty of the sea state parameters resulting from the methods of spectral estimation
S. K. Chakrabarti	1003	Wave interaction with an upright breakwater structure

Number 11

X. Chao, N. J. Shankar and C. H. Fatt	1023	A three-dimensional multi-level turbulence model for tidal motion
A. Militello and N. C. Kraus	1039	An individual-component approximation to quadratic stress for flow-decomposition analysis
H. A. Schäffer and P. A. Madsen	1057	Further discussion related to 'A formal derivation and numerical modeling of the improved Boussinesq equations for varying depth' by Beji and Nadaoka
S. Maiti and D. Sen	1063	Computation of solitary waves during propagation and runup on a slope
S.-W. Twu and C.-C. Liu	1085	The reflection coefficient of sloping walls
A. Francescutto and G. Contento	1095	Bifurcations in ship rolling: experimental results and parameter identification technique
Y.-Y. Kuo, L.-G. Leu and I. L. Kao	1125	Directional spectrum analysis and statistics obtained from ERS-1 SAR wave images

A. W. K. Law 1145 Wave-induced surface drift of an inextensible thin film

M. Taylan 1169 Solution of the nonlinear roll model by a generalized asymptotic method

D. E. Calkins 1183 A metamodel-based towed system simulation

Number 12

K. Ilamparuthi and K. Muthukrishnaiah 1249 Anchors in sand bed: delineation of rupture surface

A. F. de O. Falcão and P. A. P. Justino 1275 OWC wave energy devices with air flow control

C. T. F. Ross, D. Sawkins and T. Johns 1297 Inelastic buckling of thick-walled circular conical shells under external hydrostatic pressure

T. W. Mays, R. H. Plaut and S. I. Liapis 1311 Three-dimensional analysis of submerged, moored, horizontal, rigid cylinders used as breakwaters

K. E. Steele 1335 Ocean wave heave time series as the sum of nonharmonic sinusoids

B. Teng and S. Kato 1359 A method for second-order diffraction potential from an axisymmetric body

M. A. S. Neves, N. A. Pérez and L. Valerio 1389 Stability of small fishing vessels in longitudinal waves

Technical Notes

M. D. Earle, K. E. Steele and D. W. C. Wang 1421 Use of advanced directional wave spectra analysis methods

S. Zhu 1435 Separation of regular waves by a transfer function method
